

Brainstorming

Tools

- JHLint
- JSCS
- JSHint
- ESLint
- Prettier
- TSLint

Topics

- Benefits
 - Detect errors and bad coding patterns early
 - Better code quality
 - Unified style
 - Better code reviews
 - Less bike shedding
 - Less typing
 - Additional safety net
- History
- Popular ESLint presets
 - eslint-config-airbnb
 - Most popular styleguide for JS with semicolons
 - eslint-config-standard
 - Most popular styleguide for JS without semicolons
- Popular ESLint and plugins
 - eslint-plugin-vue
 - Additional rules for Vue 2 & 3
 - react
 - React and JSX specific rules
 - react-hooks
 - Helps with common issues related to hooks
- Linting TypeScript with ESLint vs TSLint
 - typescript-eslint
 - Babel7

- ESLint vs prettier
 - Difference linting and code formatting
 - Pros & cons
 - MD & MDX formatting
- Linting and formatting strategies
 - Manual via npm scripts
 - On save
 - On commit (pre-commit-hooks, pre-push-hook)
 - Server side (CI)
- Configuring ESLint and prettier
 - Rule types (warning, error, off)
- Overriding ESLint and prettier
 - Single line
 - Whole file
 - Disable rule entirely
